

Infinite Lagrange, the Space Strategy Mobile Initiates Closed Beta on 11th June the Infinite Unknown Galaxy is Yours to Conquer!

June 11, 2020

GUANGZHOU, China, June 11th, 2020 -- *Infinite Lagrange*, a space strategy mobile game developed by NetEase Games, is initiating its Closed Beta Test today on Android in the United States, Canada, Australia and the Philippines. In this universe, players will be able to explore the uncharted galaxy, command and build spacecrafts, involve themselves in strategic battles, and plan the development of their own space stations. They will soon take on the role of a space leader and conquer the infinite Milky Way.

Infinite Lagrange will assure players an unforgettable space journey.

Venture into and Conquer the Uncharted Space

Players will assume the duty of the leader of a galactic force. Traveling through stargates, they will venture into the breathtaking uncharted space. During the thrilling exploration, they will encounter colossal space cities and formidable fleets from other forces. As conquerors conquer more ground and grow in strength, they will discover the unknown history. In addition, space conquerors will encounter friends and foes with the same ambition to rule. They will exploit the boundless frontiers together.

Command Aircraft Carriers and Build Fleet

Interstellar conquerors will pass through the Stargate near Antontas and set course for untapped celestial systems. They initially have only 3 to 5 ships under command. Over time, they will construct a much bigger port and establish more technologically advanced ship building lines. An invincible Armada will be ready to answer to their call.

Projects like construction, production and research will be interstellar conquerors' burden to bear. There are hundreds of branches in the technology tree to choose from, intricate signature ship blueprints to design and massive shipbuilding lines to oversee. With a clear mind, the enterprise will be able to build Capital ships like frigates, destroyers, and cruisers, and Super Capital ships like battlecruisers and aircraft carriers. They dutifully serve the interstellar conqueror's strategies such as defending, mining, and anti-aircraft, in their numerous forms.

Conquer the Space by Winning Strategic Battles

Outer space makes for a treacherous journey, and a drop of water can create a storm. Forces are longing for battles. In the event of an irreconcilable conflict, interstellar explorers will have to marshal their fleet alongside their allies for a victory. To take on a massive space city, hundreds of players with tens of hundreds of fleets will have to join forces. A battle that size will make the space tremble. In their endeavor of seizing territories, interstellar conquerors get to have a thrilling experience. They will find out one of the endless possible outcomes of collaborating with allies and combating foes.

Plan production and development for a Fun Survival Experience

In addition to heated space battles, the fun of surviving in the wilderness of the universe is also ample in *Infinite Lagrange*. Every interstellar explorer needs to plan the development of the space station for a better production capacity and military power. In order to grow more rapidly, they need to collect resources or search for facilities and ruins in outer space.

Level Up with the Help of Tech Tree and Strengthen Yourself

In order to survive in a universe fraught with danger, interstellar conquerors need to enhance their strength by investing in Technology Tree. They can gain Technology Points for upgrading ships and other techs like artillery and gunboat carrying technology. Ships armed with these techs will become much more powerful. Blueprint modifications will unleash the full potential of every single ship. Joining an alliance will also grant conquerors an edge over other lone wolves out there.

The universe of *Infinite Lagrange* has witnessed the ups and downs of history in which we explore, thrive, falter, and get back to glory. Interstellar conquerors will seize planets. Also, they will discover the unfolding of history and technology development. They will familiarize themselves with the story behind every planet, every city, and every ruin. They have one ultimate goal: building Stargates. Stargates allow intergalactic travel. With them, more uncharted territories can be claimed.
